

## **Internet and Device Survey**

Parents and Guardians,

We are in the process of finalizing virtual learning plans should we be directed by the health department to close school for an extended period of time. Related to this, please complete the survey below so we can learn more about student access to technology at home. Should the district choose to utilize home instruction during a school closure, the home instruction day(s) will count towards students' required 180 days of instruction. Please be assured that we are confident in our abilities in providing this type of instruction and that we will not need to adjust our schedule to test our systems or capabilities. Thank you for your participation in our survey.
